

**Remarks**

Before entry of this amendment, claims 1-12 were pending in the application. By this amendment, claim 5 is amended to correct an obvious clerical error, and new claims 13-15 are added. Support for the text of the new claims can be found throughout the application and claims as originally filed. For instance, the Background (at paragraphs [0002] through [0005]) discusses use of seeds (including oil containing/producing seeds) for production of meal, animal feed, livestock feed, grain, and so forth. Paragraph [0025] further discusses production of seed (and seed mass), as well as feed grain crops, animal feed, and more generally plant parts, in the context of plants having a modified oil content phenotype (“a HIO32.2 phenotype”). Paragraphs [0041] and [0042] also describe genetically modified plants with an altered oil content phenotype, which may be “oil content in any part of the plant” including the seeds, and including in grain-producing plants.

No new matter is added by this amendment.

After entry of this amendment, **claims 1-15 are pending** and ready for substantive examination. If any questions remain, the Examiner is invited to telephone the undersigned.

Respectfully submitted,
